

FEES 2023/4

Module 1 and 2 training is the same across all the programmes, however, from Module 2 students can opt for Clinical Skills training, in addition to the core training. In order to take on practice clients prior to the clinical programmes students must complete Pre-clinical Skills. Clinical requirements may extend beyond the core taught academic programmes. Fees are the same for both Distance Learning and In-Person training.

PLEASE NOTE For all Clinical Diplomas, individual supervisions will be required in addition to group supervisions in order to reach and complete clinical requirements.

Transition year students do not have a studies advisor.

Fees may be subject to changes each year determined by programme adjustments and inflation.
