

FEES 2024/5

Module 1 and 2 training is the same across all the programmes, however, from Module 2 students can opt for Clinical Skills training in addition to the core training. In order to take on practice clients prior to the clinical programmes students must complete the Pre-clinical Skills course or the Module 2C Coaching Skills course.

All students are registered with Middlesex University.

Fees are the same for both Distance Learning and In-Person training.

PLEASE NOTE

Fees may be subject to changes each year determined by programme adjustments and inflation.

Clinical requirements may extend beyond the core taught academic programmes. For all Clinical Diplomas, individual supervisions will be required in addition to group supervisions in order to reach and complete clinical requirements. Transition year students do not have a studies advisor.

PSYCHOSYNTHESIS PSYCHOLOGY MA
